The Making of an Alert Depositor: How Payment and Interest Drive Deposit Dynamics

Xu Lu, Yang Song, and Yao Zeng

Discussed by Sergey Sarkisyan (OSU)

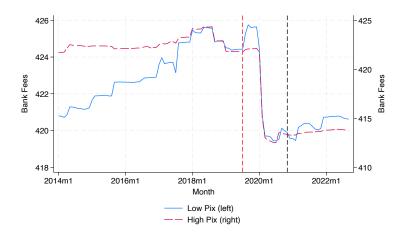

August 22, 2024

< □ > < (四 > < (回 >) < (回 >) < (回 >)) 三 回

Interbank transfers in the US

- Transferring money from bank to bank can be costly
- Average transactions clear 2-3 business days
- Fees associated with wire or instant transfers
- Slow development of alternatives like FedNow
- Reasons why deposits are sticky

Bank fees in the presence of alternatives

EFA

The graph is from Liang, Sampaio, Sarkisyan (2024)

• Depositors are more alert when payment systems are more efficient

- Transfer delays contribute to people staying at the bank

• When interest rates are high, depositors actively move

- More moves from banks with delays

Very important contribution to the literature

- Other papers focus on movements in bank deposits
- Erel et al (2023), Koont et al (2023) on digital disruptions
- Sarkisyan (2024) on payment systems
- No paper to my knowledge shows how and why depositors transfer between their own accounts
- Quantifies delay times and their importance important to convince policymakers

A TEN A TEN

Summary of my comments

Payment channel interpretations

Interest channel interpretations

Minor comments

э

Comment 1: Payment channel

- There are at least 2 reasons why depositors would move:
- 1. Because other banks are more convenient
- Depositors value convenience
- 2. Because your bank is more convenient
 - Easy to transfer

It would be nice to separate two channels

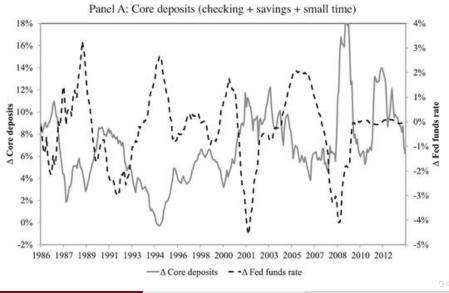

- Track depositors' actions after the move
- Do they move again?
- Is the bank they moved to more convenient?
- Differentiate between banks being inefficient and households not wanting to use instant payments
- Bank or bank-time fixed effects might help

4 3 5 4 3

Comment 2: Interest channel

- The paper focuses on depositors moving to other banks
- Deposit channel: people move out of banks to MMMF
- Deposit outflows raise banks' interes rate risk but it is different from the authors' risk notion
- Authors mean unearned interest due to delays
- Annual interest rate over 2-3 business days is it a big risk?

Deposit channel

EFA

• Differentiate between saving and time deposits using interest income

• Saving deposits are easily accessible but time deposits are the ones paying high interest

• Time deposits do not flow out that much (Supera (2022))

10 / 12

- Show pre-trends in identification
- The model is useful but perhaps best fit for Appendix
- What is the motivation behind the size filter? Show the robustness
- Think why R^2 's are so low and t-stats are so high in Table 3

(I) < ((()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) < (()) <

 Very important paper – a vital contribution to move forward with payment developments

• More insight into underlying channels would be useful

Good luck!
